importing files in the preamble

Session 1

2020-03-05 12:06:25 -0500

Input commands from external tex file

knitr can't process newcommands with arguments properly,
they must be defined in an external tex file and then imported.

new commands within Rmd file

fourscore

and seven years ago

new command from imported tex file

This should plot a logo in the southeast corner of the slide.

i‹clicker.

new command from imported tex file

1. AA
2. BB
3. CC
4. DD
5. All of 'em, Katie.

i>clicker.
